DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 is rejected because the phrase "to prevent a non-preferred agent from holding the first bus too long" on the last line is indefinite. How long is too long?

Claim 9 is rejected because it is not clear what the difference is between "a)" and "b)". Both recite that each/both of the interfaces operate bidirectionally. It is also not clear what is meant by "a dominant direction of packet travel" in "b)". What constitutes "dominant"?

Allowable Subject Matter

3. Claims 1-5,7,8, and 10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: As noted in the parent case, the prior art does not show an IC with first and second interfaces each coupled to send packets over one bus but not the other and vice versa with the IC being configured such that either preference is not given to either interface when claiming transactions from a queue or the first interface is preferred over the second when claiming transactions. These limitations in combination with the other claimed limitations are not shown by the prior art and do not appear to have been obvious.

Conclusion

Art Unit: 2111

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The newly cited references show bus bridges coupling buses together with each bus coupled to an interface. But these references do not show the details claimed.
